DIGILINK offers a range of high quality, state of the art designed Face Plates for professional installations, needed to provide fully compliant copper cabling systems. The Face plates are inbuilt with transparent shutters which are compatible with any standard coloured keystones jacks thus giving advantage. We recommend that you use the DIGILINK standard jacks available in all standard colours & are high performance that fit well with the face plates. The silver Plus face plates are with the latest trends & richer looks, which hide the screws thus giving different corporate looks.

Application:

Termination of twisted pair LAN and telephone cables.
